

IRFAN HABEEB K

Mechanical Engineer | Data, Operations & Project Management

irfanhabeeb550@gmail.com — +91 8606139046 — CGPA: 6.62 / 10 — linkedin.com/in/irfanhabeebk

EDUCATION

B.Tech, Mechanical Engineering, NIT Calicut

2022 – 2026 CGPA: 6.62

Class XII, DUHSS Thooththa, DHSE Kerala

2021 Score: 1172/1200 marks

Class X, DUHSS Thooththa, DHSE Kerala

2019 Score: 100%

TECHNICAL SKILLS

Programming & Databases: MySQL, SQL Server (ETL, complex queries, indexing, query optimization), RDBMS concepts

Data Analytics & Visualization: Power BI (advanced DAX, KPI dashboards), Microsoft Excel

Cloud & Big Data: Familiar with AWS, Azure, and Google Cloud Platform concepts; Big Data foundations

Automation & AI: n8n Workflow Automation, API Integration, Google Gemini AI, Google AppSheet

Productivity Tools: Google Docs/Sheets, GitHub; familiarity with AI-assisted SQL generation tools

Design: SolidWorks, CAD

EXPERIENCE

General Manager, UrbanCozy, Kochi

May 2025 – July 2025

- Analyzed operational data to identify bottlenecks; implemented 3+ process improvements using data-driven decision-making.
- Translated cross-functional business requirements into actionable technical and operational solutions.
- Collaborated with procurement, operations, and site teams to resolve real-time challenges, maintaining clear communication with stakeholders.

Intern, Cochin Shipyard Limited, Kochi

January 2024 – March 2024

- Gained exposure to project management frameworks and business development workflows in a large-scale engineering environment.

PROJECTS AND INITIATIVES

Data Warehouse and Analytics Project

GitHub

- Built a modern data warehouse on SQL Server using Medallion Architecture (Bronze, Silver, Gold layers), integrating data from two source systems (ERP and CRM) via ETL pipelines with data quality checks and testing.
- Designed a unified data model and wrote SQL-based analytics to derive insights on customer behavior, product performance, and sales trends; built an end-to-end Power BI dashboard on top of the warehouse.

MySQL Data Analytics

GitHub

- Built an end-to-end ETL pipeline using Python and MySQL on a 9,994-record retail dataset; performed data cleaning, transformation, and loading via SQLAlchemy, and wrote analytical SQL queries to derive business insights across sales, profitability, delivery performance, and customer segmentation.

Power BI Developer

GitHub

- Designed live business monitoring dashboards with deep-dive analytics, KPI tracking, and a healthcare analytics dashboard using advanced DAX, converting business requirements into visual data solutions.

Scalable Event Access Control Application (Google AppSheet)

- Designed and deployed a multi-gate entry management app for 10,000+ attendee events with offline-first operation, color-coded feedback, and role-based access control, translating operational requirements into a robust technical solution.

POSITIONS OF RESPONSIBILITY

Head, Program Committees, Ragam 2026, NIT Calicut

Sep 2025 – Jan 2026

- Led end-to-end delivery of Ragam 2026, NIT Calicut's annual cultural fest; oversaw program committees, coordinated 10,000+ participant logistics, and managed budgets and vendor negotiations across venues.

Marketing Executive, Tathva, NIT Calicut

Oct 2023 – Jan 2024

- Connected with 20+ brands, secured sponsorships, and maintained long-term sponsor relationships.

Senior Executive, Mechanical Engineering Association, NIT Calicut

Oct 2023 – 2026

- Organized workshops, lectures, and events; coordinated alumni programs for 200+ students.

VOLUNTEER EXPERIENCE

Head, Blood Forum, NSS, NIT Calicut

2023 – 2026

NSS Volunteer, NIT Calicut

2022 – 2026

Rajyapuraskar Awardee,

Scouts and Guides

2018 – 2019
